Times: 1:00 pm – 4:00 pm

Cost: \$55.00

Who Should Take This Training?

The University of New Hampshire Cooperative Extension will offer trainings in March and April to prepare prospective applicators for the private and commercial applicator certification exams at the operational level. Please note that this course does not satisfy the requirements for applicators looking to get certified as Supervisory Registration Certification - General Use Applicators.

Attendance at an initial certification training class is not required for certification at the operational level. However, it does help direct the studying. Instructors will provide a review of the information found in the National Pesticide Applicator Certification Core Manual, NH Code of Administrative Rules, and the Worker Protection Standard for Agricultural Pesticides. Private applicator testing will be held the last day of training at each location.
